Support your Terminal Emulation (TE) apps right out of the box

Run your existing TE apps, right out of the box — no backend modification or user training required. Two solutions make it easy to transform your green screens to intuitive touch screens that boost productivity. All Touch Terminal Emulation (ATTE) powered by Wavelink, one of the world's most popular Terminal Emulators (TEs), is ready to use at no cost — pre-loaded on every model and pre-licensed on the gun-style model. And if you're using TekTerm with your legacy WinCE devices, StayLinked SmartTEK paves the way for easy migration to the Android-based EK430. And if you want to use a different TE, no problem — with support for leading TEs, the choice is yours.
